Lookers, Oklahoma

ROUTE TWO

Group A

These grapes were originated by the late T. V. Munson of Dennison, Texas, a great scientist and one of the world's foremost authorities on grape culture.

These grapes were produced by crossing the Concord family with the Native Post Oak, a large summer grape. They ripen evenly, which the pure Concord does not do in this country. They do not wilt so easily in dry, hot weather.

The vines make a strong growth and are not so likely to be bothered with insects or diseases.

The skin is tough and the seed leaves the pulp readily.

They do not need to be set so close in the vineyard and do not need to be pruned so close, nor do they have to be gathered as soon as they ripen.

EXTRA

15 Cents Each, \$10.00 Per 100

Vine vigorous, medium cluster, moderately compact, medium berry. Extra is a black grape that ripens in late mid-season. With us it bears heavy each year under all conditions. Bears young and without trellis. This is our best seller and indeed a dependable, all purpose grape for Oklahoma.

BAILEY

15 Cents Each, \$10.00 Per 100

Moderately vigorous clusters, medium to large black berry. Ripens at mid-season. Makes good showing on vine, also in the basket. *Bailey* and *Extra* are sisters, though Bailey has more of a running type of vine.

CARMAN

15 Cents Each, \$10.00 Per 100

Moderately vigorous to very vigorous, varies as to soil conditions. Clusters large to very large. In our deep sand Carman is a strong growing, profitable, late mid-season, black grape that will hang on the vines many days after becoming ripe, without deteriorating.

AMERICA

15 Cents Each, \$10.00 Per 100

Strong growing, jet black, medium-sized grape. The pulp is tender and the juice intense violet red with a distinct peculiar flavor, much liked by some. Grown extensively for juice purposes. Is not attacked by mildew rot or leaf folder. This grape has many characteristics of the wild grape and should be planted near other varieties.

BEACON

15 Cents Each, \$10.00 Per 100

Strong growing, heavy yielding of large clusters of black grapes with rather heavy white bloom. Makes red juice. This is a heavy producing grape that should be harvested soon after it is ripe.

MUENCH

15 Cents Each, \$10.00 Per 100

Very vigorous and free from disease. Medium cluster. Red juice. Ripens late and keeps late into the fall. Our latest ripening black grape.

Group B

Grapes in Group B were originated by T. V. Munson and are more than half California or European with enough Concord and Post Oak to make them hardy. They are particularly adapted to the warm, dry climate of the Southwest and are high in quality.

LAST ROSE

15 Cents Each, \$10.00 Per 100

Vine moderately vigorous. Cluster large, very compact; color dark red when fully ripe. This is a very late grape and will hang in good condition until frost. Plant near other varieties.

ARMALGA

15 Cents Each, \$10.00 Per 100

Moderately vigorous stocky vine. Medium size clusters of yellowish white, medium sized berries of best quality. Late mid-season grape.

ELLEN SCOTT

15 Cents Each, \$10.00 Per 100

Moderately strong grower. Clusters large, compact, of violet color. Thin

skin, pulp very tender. Makes more juice per bushel than any other grape. Ripens late in mid-season and considered an excellent table grape. This grape does not ship well, being subject to black rot in humid climate.

Group C

This class of grapes will probably do well over a territory both North and South.

NIAGARA

15 Cents Each, \$10.00 Per 100

An old time, standard white grape, probably the best all-round mid-season white grape with good cluster and berry, with flavor agreeable to most tastes.

CATAWBA

15 Cents Each, \$10.00 Per 100

Vine moderately vigorous, medium to large cluster and berry; clear dark-red, excellent table grape. Makes fine flavored, light red juice. Regarded as Oklahoma's leading red grape, adapted to a wide range of soil and climate. Ripens late.

GOETHE

15 Cents Each, \$10.00 Per 100

A large, light red grape. Ripens late. A fine eating grape with a delicious flavor. Makes lots of juice with light color. Does not always ripen evenly.

LUCILE

15 Cents Each, \$10.00 Per 100

Makes beautiful, bright red clusters that ripen in early mid-season. Sometimes brings extra price. Will wilt on vine in dry, hot weather.

CACO

15 Cents Each, \$10.00 Per 100

A large red grape of fine quality. Berries large, sweet and juicy with a pleasing flavor. A mid-season grape.

DELAWARE

15 Cents Each, \$10.00 Per 100

A small, red grape with compact clusters, of the highest eating quality. Ripens in mid season.

FREDONIA

15 Cents Each, \$10.00 Per 100

A new, very early black grape originated and tested by the New York Experiment Station. Good bunch and berry with excellent flavor. Vine vigorous. The best early black grape.

GOLDEN MUSCAT

25 Cents Each, \$20.00 Per 100

Another new grape originated at the New York Experiment Station. Large clusters of beautiful, golden colored, large, meaty berries of wonderful quality and excellent flavor. The nearest in appearance and taste to the European varieties.

PORTLAND

15 Cents Each, \$10.00 Per 100

Extra early white grape with splendid eating qualities. Indeed a fancy table grape to begin the grape season.

HENRYETTA

25 Cents Each, \$20.00 Per 100

Large, red, high quality grape with medium-sized compact clusters that originated at Henryetta, Okla. A strong growing, vigorous vine. Ripens mid-season.

SENECA

25 Cents Each, \$20.00 Per 100

A sensational new variety. The fruit characteristics are of the California type of grape, but the vine is hardy. Clusters are medium, loosely formed. Berries are medium sized, oval shaped and yellow when fully matured. Its firm, crisp berries combined with a sweet, delicious flavor, make it the very finest table grape of all. Ripens early, but hangs on vine without loss of flavor.

WESTFIELD

25 Cents Each, \$20.00 Per 100

One of the NEW grapes. It is in no sense a table grape. One of the darkest colored juice grapes. It has 12 times as much color as a Concord. Clusters are medium and very compact. Vines are vigorous, hardy and productive.
